

Place the title here in 13 point bold Calibri. Please, use the same title of the short abstract already submitted.

Author¹, A.T., M.U. Author², & A.B. Authorⁿ

¹*Affiliation first author*

²*Affiliation second author*

.....

ⁿ*Affiliation nth author*

Keywords: Please add up to five keywords

Introduction

All the abstracts are accepted in extended format. In addition to extended abstract submission, we have to inform that within the scientific themes of the Conference selected papers will be published in pre-reviewed scientific journals. Additional information about these journals will be given soon. The deadline for extended abstract submission is 15 March 2018. The extended abstracts will be reviewed by the Scientific Committee of the Understanding the Problems of Inland Waters: Case Study for the Caspian Basin (UPCB) and collected in a volume which will be made available after the Conference in electronic format.

Materials and methods

Please use this template to prepare your extended abstract by substituting this text on your own. Please carefully follow the directions provided as follows:

- First paragraphs of each chapter should not be indented;
- Extended abstracts must not exceed 1,500 printed words (including references, titles, authors' names and affiliations, and keywords) and they can contain a maximum of two figures and one table;
- All submissions should be prepared using A4 page format (21 x 29.7 cm). A4 page format is a standard option on all versions of Microsoft Word, as well as most other document preparation programs. Please prepare your extended abstract as Word files (.doc or .docx) on an A4 page format and allow 3 cm margins on each side;
- Use an 11 point Calibri font;
- Research type article should be prepared according to IMRAD structure (en.wikipedia.org/wiki/IMRAD). In this case, please make sure to present your results and discussions separately;
- Beside research articles, other article types may include case report, case series and/or meta-analyses. In these cases IMRAD structure is not mandatory.

Results

Manuscripts should conform to standard rules of English grammar and style. Either British or American spelling may be used, but consistently throughout the article. Try to keep your article as concise as possible. Authors who use English as a foreign language are strongly recommended to have their manuscript proofread by a native English-speaker since no language-editing service will be provided by the Conference organization. The name and year system should be applied to the references, e.g., Smith & Jones (1993) or (Smith & Jones, 1993), and for more than two authors, Smith et al. (1982). Papers which are unpublished or in press should be cited only if formally accepted for publication.

References will follow the styles as given in the reference section of this template, i.e., journals are NOT abbreviated, only volume numbers (not issues) are given, only normal fonts are used, no bold or italic.

Discussion

Authors are urged to comply with the rules of biological nomenclature, as expressed in the International Code of Zoological Nomenclature, the International Code of Botanical Nomenclature, and the International Code of Nomenclature of Bacteria. When a species name is used for the first time in an article, it should be stated in full. Genus and species name must be written in *italics*.

Please, embed figures and tables in your text and position them where you think they have to be placed according to the example provided. Please do not forget to insert a caption below each figure and table. If you are not familiar with Word's handling of pictures, we offer some tips: the "format picture" dialog is the key to controlling position of pictures and the flow of text around them. You access these controls by selecting your picture, then choosing "Picture..." from the "Format" menu. To correctly place the caption under your figure you can eventually insert a table containing one column and two rows in your text. Then paste the figure in the first row and place the caption in the second row. A better result is

Fig. 1. Please, don't forget to insert a caption! Use a 9 point Calibri font for captions

generally obtained if you paste your figure as an "enhanced metafile." You can use color figures but they should be kept readable when printed in black and white.

5102760

Variable	Lake 1	Lake 2
Biomass [mg L ⁻¹]	15.4	7.8
Density [cell L ⁻¹]	6.52 x 10 ⁶	1.5 x 10 ⁶
P-PO ₄ [µg L ⁻¹]	7.2	4.1
pH	6.8	7.5
Temperature [°C]	21.7	18.2

Table 1. Also in this case, please insert a caption

Acknowledgements

Anything to acknowledge grants, scholarships, any kind of help, etc., can be provided here. Please consider that the above mentioned maximum words of the abstract, 1,500, includes this section as well. FYI, please, also note that this template contains 935 words.
